Software Engineer (Full Stack Developer)  
[flamasherpa1s@semo.edu](mailto:flamasherpa1s@semo.edu) | 573-730-4339

## PROFILE

Motivated Computer Science graduate with hands-on experience in full-stack development and AI integration, seeking an entry-level Software Engineer role. Proficient in coding with Java, Python, and C#, and skilled in building large-scale infrastructure and web applications using React, SQL, and modern frameworks. Experienced in software testing, database management, and deployment on AWS, with a strong focus on scalability, maintainability, and high-quality code. Collaborative team player eager to contribute to mission-critical software solutions and rapidly grow in a dynamic development environment.

**EDUCATION** (Southeast Missouri State University | B.S. in Computer Science)

Grade - 3.87 GPA

Certificates: AWS Certified Cloud Practitioner

## WORK EXPERIENCE & PROJECTS

**Radical AI** (Fall Internship) | Oct 2023 – Jan 2024

AI Engineer Intern

- Built a prototype AI-powered financial analysis tool using Google Gemini AI and LangChain during a hackathon
- Explored Vertex AI workflows, gaining foundational experience in how data is prepared, models are trained and tuned, and results are evaluated, which provided practical insight into deploying machine learning solutions on cloud platforms.
- Integrated OpenAI language models into Python OOP applications, enhancing automated reporting and reducing manual analysis time by 30%.
- Participated in bi-weekly team meetings to discuss blockers and share learnings, gaining insight into agile workflows and strengthening collaboration skills in a technical team environment

**Anonymous Next.js Messaging Web App** ([Personal Project](#)) | Aug 2024 – Sept 2024

- Engineered a secure, full-stack anonymous messaging web application leveraging **Next.js** for server-side rendering (SSR) and dynamic site generation (DSG) to optimize performance.
- Implemented authentication with NextAuth and designed a responsive UI using Tailwind CSS + shadcn/ui, improving accessibility compliance to 95% across devices.
- Optimized code maintainability using TypeScript and React Hooks, reducing potential bugs by 25% through type safety and modular state management.
- Developed efficient, scalable database models with Mongoose and integrated **MongoDB** for secure data storage.
- Validated forms and API requests with Zod, preventing 100+ potential invalid data entries during testing.
- Integrated **OpenAI** for auto-generating messages, significantly enhancing user interaction.

**AI-Powered Image Analysis Web App** ([Personal Project](#)) (Aug 2025 – Sept2025)

- Developed a full-stack web application that utilizes Clarifai's General Image Concept Model to generate multi-word descriptive tags (e.g., "red sports car," "sunset beach"), enabling users to extract detailed insights from visual content.
- Built backend services in Express.js and integrated Clarifai's gRPC API, reducing image processing latency by 50%.
- Designed and implemented a **PostgreSQL** database to store and manage user-uploaded images and analysis results.
- Implemented a React-based frontend, enabling users to visualize image analysis results in under 2 seconds per query.

## TECHNICAL EXPERTISE

- **Programming Languages:** Python, JavaScript, TypeScript, Java
- **Web Technologies:** HTML5, CSS3, NodeJS, React, Next.js, Tailwind CSS, Express.js
- **Frameworks & Libraries:** React, Node.js, Express.js, shadcn/ui, LangChain, FastAPI
- **Databases:** MongoDB, PostgreSQL
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, Linux
- **AI/ML Tools:** OpenAI, Google Gemini AI, Vertex AI
